Hi Deb !

Don't worry it's ok, I'm happy to receive your answer. :)
(I didn't receive your message on WhatsApp probably because I changed my phone number.
Now, it is +33 7 85 65 87 97. I think I'll be able to receive your messages after you update my
contact..)
My apologies for answering your email only now. >.>

First, I want to thank you for everything that you, Gus and everybody did for me while I was living in
your house.
I keep good memories in mind and I won't forget them, and I won't forget that you were always there
to
support and help me during the most difficult moments.

I'm glad to read that Pablo enjoys high school.
Does he continue to play piano? Or did he stop?
And it's cool that he's still doing drama/theater, he has talent.

I feel better now. It took time for that, but I feel better. I don't have bipolar disorder anymore,
seeing my family and hanging out with my friends helped me for that.

A lot happened in France since I left the US. I would have a lot to tell you on the porch, with a cup of
tea. x)
I thought that I would have contacted you earlier, but as soon as I arrived in France I had
several things to do which took me really busy. I wanted to give news when my situation would be
stabilized..

I found a job since the middle of september. I started at the beginning of October. I work in an IT
consulting company. In short, I work for a short period (between 1 and 2 years) in a bank company to
do programming stuff.
So, I help traders to make money.. not proud of that. >.>
It's not the best job I could find. But, I will improve some skills I wanted to learn. Also, I wanted to get
a job quickly for one or two reasons. It is just a temporary job.
Now, I'm looking for an appartement to rent in Paris, not easy. After that, I will have a stable situation,
and it will be easier to organize, to think, to hang out with friends...

I started to practice sport. I do some climbing with two of my friends. It is not so easy, but it really is
funny even for beginners.
I plan to do more activities when I will have my apartment.

Last thing, I failed to be in contact directly with Vivian.
In June, I understood she contacted several of my friends and my brother. But, I didn't imagine she
corresponded
so much with them. And I had difficulties to imagine she wanted to contact me after the paper I
received..
I would have a lot to say about this subject, but it would be too long and complicated in this email.
Just, my friends helped me to see her, but I missed occasions, she missed occasions... My parents and
my brother would prefer that I don't go out with her.
They did what they could so that I don't see her, even recently. It is sad. They are worried to see me
going back to the US, they may think I wouldn't contact them or something like that. Maybe they
think that because I wasn't talkative last semester. I had bipolar trouble, I wasn't in the mood to see
people, because I didn't feel well. It wasn't against anyone.
Anyway, I know what they did in my back. Even if it was to protect me or because they love me, it
didn't respect me, it was unfair.
They even tried to suggest me to go out with Maud whereas we are friends.
Did they think I was desperate or whatever, so I would try to go out with anyone? It doesn't work like

that.

I'm not angry against them because I understand their point of view, but I won't forget that.

Now, I'm not sure that Vivian still wants to see me. And most of friends aren't sure I should continue to hope anything.

They would more to say but I think I wrote enough about that now. Sorry for writing so much about that.

This story is frustrating and quite sad, but don't worry I feel quite good even if it seems the opposite.

I will contact you or Gus by WhatsApp or on Facebook now. I just had a lot to say in one time, that's why I used emails. Thank you for the photo, I didn't forget I have to send you the ones I took.. ;)

You can forward this email to Gus. I hope he's going well.

Say Hello! to Pablo, Téo, Isabella, your sister, your mum...

Take care of you and your family!

Talk to you soon. 😊

Aymeric
